

MAVERICK SOLAR WARNING LIGHT

The Interplex Solar Maverick has been a leading warning light package for decades. With new tooling, we are able to increase production efficiencies and reduce our costs passing those savings onto to our customers. By lowering the acquisition costs for our customers, it is our intention to replace the need to ever purchase a conventional battery light again and eliminate costly maintenance expenses. The Maverick is a Type A/C warning light package that operates maintenance free for years with leading photovoltaic technology. The system turns on at Dusk, operates all night and shuts off at Dawn.

- (1) Operation: Flashing and Steady Burn
- (2) Material: ABS Plastic Housing, Polycarbonate lens
- (3) Power supply: Lithium ION rechargeable Batteries
- (4) High Intensity LED's provides intense light output
- (5) Available in two colors: Amber and Red
- (6) Max Power: 150mw
- (7) Visual Distance: >1/2 mile
- (8) Automatic operation: On at Dusk, Off at Dawn.
